SKILLS

- Python
- C++
- PHP
- JavaScript
- SQL (Microsoft SQL Server & MySQL)
- HTML5 & CSS3
- Data Structures & Algorithms (DSA)
- Machine Learning & Artificial Intelligence
- Software Engineering
- Problem Solving

LANGUAGES

- English (Fluent)
- Urdu (Native)
- Punjabi (Fluent)

PROFILE

Computer Science undergraduate with hands-on experience developing AI, machine learning, and full-stack web applications. Built multiple end-to-end projects using Python, C++, PHP, JavaScript, SQL, and modern AI tools. Passionate about solving real-world problems through software engineering and continuously learning emerging technologies.

PROJECTS

- AI-Powered Web Scraping Agent | Python, BeautifulSoup, Requests, CSV, JSON
- Developed an intelligent web scraping agent that autonomously extracts book information (title, price, availability) from websites.
 - Implemented pagination, filtering logic, and automated data storage in CSV and JSON formats.
 - Applied AI concepts including the PEAS framework and goal-based agent behavior while following ethical web scraping practices.
- Student Performance Prediction System | Python, Scikit-learn, XGBoost, Pandas, Matplotlib
- Built a machine learning model to predict student exam performance using a dataset of 6,607 records.
 - Performed data preprocessing, feature engineering, exploratory data analysis (EDA), and model evaluation.
 - Compared multiple regression models and achieved an R^2 score of 0.914 using XGBoost after hyperparameter tuning.
- Furqan Store - Full-Stack E-Commerce Platform | PHP, MySQL, JavaScript, HTML, CSS
- Developed a multi-role e-commerce platform supporting Admin, Vendor, and Customer modules.
 - Implemented secure authentication, shopping cart, order processing, vendor commission management, and REST-style APIs.
 - Applied security best practices including password hashing, prepared statements, session management, and input validation.
- Student Fee Management System | Software Engineering, Database Design, UML
- Designed and developed a complete fee management system with student registration, fee processing, installment tracking, and automated reporting.
 - Implemented secure role-based authentication, backup/restore functionality, and comprehensive Software Engineering documentation including UML diagrams.
- Student Management System (Web Application) | HTML, CSS, JavaScript, Chart.js
- Developed a responsive web-based student management system with CRUD operations, CGPA calculation, fee management, dashboard analytics, and CSV export.
 - Utilized LocalStorage for client-side data persistence and dynamic user interface updates.

CERTIFICATES

- C Intermediate – Sololearn (July 2026)
- SQL Intermediate – Sololearn (June 2026)
- Data Analytics with AI – Sololearn (June 2026)
- Generative AI in Practice – Sololearn (June 2026)
- Claude with Anthropic API – Anthropic Academy (June 2026)
- AI Fluency: Framework & Foundations – Anthropic Academy (June 2026)
- Claude Code 101 – Anthropic Academy (June 2026)
- Introduction to HTML – Sololearn (June 2026)
- Coding Foundations – Sololearn (June 2026)
- Character Mastery – The Superior University (September 2024)
- Python Intermediate – Sololearn (July 2026)

TECHNICAL TOOLS

- GitHub
- Git
- VS Code
- Postman
- MySQL
- Microsoft SQL Server
- Google Sheets
- n8n
- Gemini API

Face Mask Detection System | Python, OpenCV, TensorFlow, MobileNet CNN

- Developed a real-time face mask detection system using MobileNet-based CNN and OpenCV.
- Implemented webcam-based inference with CPU optimization, along with audio and visual alerts for users not wearing masks.

Restaurant AI Automation Workflow | n8n, Gemini API, Google Sheets

- Designed an AI-powered workflow to automate restaurant operations including order management, inventory tracking, sales reporting, and customer FAQ responses.
- Integrated Gemini API with Google Sheets for real-time automation and AI-driven customer feedback analysis.

Student Management System (DSA) | C++, Data Structures & Algorithms

- Built a console-based student management system implementing linked lists, vectors, searching, sorting, authentication, GPA calculation, and file handling.
- Demonstrated practical implementation of core Data Structures and Algorithms concepts through a menu-driven application.

Additional Projects: Student Management System, Snake Game, Tic Tac Toe, Water Jug Solver (BFS), SQL Analytics Practice, DSA Lab Implementations, Assembly Programming, and more on GitHub.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

The Superior University, Lahore

2024 -2028 (Expected)

CGPA: 3.50/4.00

Intermediate in Computer Science (ICS)

Superior College, Lahore

2022 -2024

Grade: A (923/1200)

Matriculation (Computer Science)

Government High School Awan Town, Lahore

2020 - 2022

Grade: A+ (1006/1100)
